TryHackMe Profile: tryhackme.com/p/om.jadhav2091

PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer with hands-on experience in building secure web applications using Node.js, Express.js, and MongoDB. Skilled in designing RESTful APIs, implementing JWT-based authentication, and role-based access control. Strong foundation in web application security and OWASP Top 10 vulnerability mitigation, with practical exposure to tools such as Nmap, Wireshark, and Burp Suite. Passionate about secure system design and building a long-term career in cybersecurity.

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript
Web Technologies: HTML, CSS
Backend & Frameworks: Node.js, Express.js
Databases: SQL, MongoDB
Tools & Platforms: VS Code, GitHub, Vercel, Render
Cybersecurity tools: Wireshark, Nmap, Metasploit, Burp Suite, hydra
Operating system: linux and windows

EDUCATION

B.E. in Computer Engineering :
P.E.S. Modern College of Engineering, Pune
CGPA: 8.2 +
12th (PCM):
Priyadarshini jr college of arts, commerce and science
Percentage: 75.33%
10th:
Priyadarshini high school (CBSE)
Percentage: 86.83%

PROJECTS

Digital Dynamics Review

- **GitHub:** https://github.com/Om-jadhav/digital-dynamics-review
- Developed a secure web application for publishing and managing digital reviews using Node.js, Express.js, and MongoDB with JWT-based authentication, role-based access control, RESTful APIs, input validation, and password hashing.
- Built responsive UI components using Bootstrap and structured MongoDB schemas for efficient content management and cross-device compatibility.
- **Tech Stack:** Node.js, Express.js, MongoDB, EJS, JWT, Bootstrap

Password Strength & Complexity Checker

- **GitHub:** https://github.com/Om-jadhav/password-checker
- Developed a Python CLI tool for password analysis, evaluating strength through length, entropy, character diversity, and modern security standards.
- Integrated argparse for flexible inputs, breach detection API for leak checks, and packaged as an executable for local security testing.
- **Tech Stack:** Python, argparse, API Integration

Expense Tracker

- **GitHub:** https://github.com/Om-jadhav/expense-tracker
- Built a responsive expense tracker using HTML, CSS, and JavaScript with dynamic transaction handling and real-time balance updates.
- Integrated Chart.js for visualizing expenses and trends, featuring an interactive UI with categorized tracking and graphical insights.
- **Tech Stack:** HTML, CSS, JavaScript, Chart.js

INTERNSHIPS & CERTIFICATIONS

Cybersecurity Intern - Prodigy Infotech

- Developed a Password Strength Checker with breach detection API integration to assess credential security.
- Built a Caesar Cipher encryption/decryption tool to demonstrate fundamental cryptographic techniques.
- Implemented a pixel manipulation tool for basic image data processing and transformation.
- Created a simple keylogger project (for educational purposes) to understand keystroke monitoring and security implications.

Hackathons

- **Smart India Hackathon (SIH):** Worked on student mental health problem statement; conceptualized solution but did not implement due to portal submission limits.

Certifications

- Networking Basics – CISCO Networking Academy
- Pre Security Learning Path - TryHackMe
- Introduction to IoT – CISCO Networking Academy
- JLPT N5 Cleared – Japanese Language Proficiency Test
- Fortinet certified associate in cybersecurity - Fortinet
- Introduction to Linux – The Linux Foundation
- Cyber Threat Management - CISCO Networking Academy
- Networking Devices and Initial Configuration – CISCO Networking Academy
- AWS Cloud Security Foundations – Amazon Web Services
- Introduction to Threat Landscape – Fortinet
- Fortinet Fortigate Operator - Fortinet
